

INSTALLING YOUR

SheGoes Lightroom Preset Pack

Thank you so much for supporting my blog and I hope you enjoy your presets! Here are the instructions for installing your Lightroom presets into the Adobe Lightroom Desktop Software.

For Desktop:

- 1) Download the zip file to your computer.
- 2) Open Adobe Lightroom and click on the Develop tab next to Library at the top.
- 3) Scroll over to the left of your Lightroom screen to the column where it says Presets. Click the + sign in the upper right corner and then select "Import Presets."
- 4) Select the zip file that you downloaded from my website and click on the presets you want to import. They should automatically upload when you select Import!
